

From our family to yours—health and sustainability are integral Intenza values. For more than ten years Intenza has driven this key conversation and propelled meaningful change for people around the world. We not only inform our community but inspire them to take meaningful action today, and every day; so for this reason we are pleased to introduce the Mous[™] Fitness Bottle to our global partners. We believe that the best things are made with care and are built to last, therefore investing in a reusable water bottle that can be refilled throughout the day, or powered up with smoothies, makes the Mous™ Fitness Bottle the perfect companion any time you walk out the door and this is how fitness should feel mous
