

ESCALATE STAIRCLIMBER

Escalate Stairclimber is ideal for active aging, HIIT training, and low — impact rehab sessions, featuring 20 adjustable step heights between 10 to 19.5cm (4—7.7"). This unique training versatility enables the targeting of different muscle groups, setting them apart from traditional fixed — step height stair climbers.

LANDMARK PROGRAM

Elevate your workout to new heights by climbing 31 iconic landmark buildings from all over the world. Landmark program is designed specifically for the Escalate to simulate tower running, or vertical marathon, providing a fresh workout option for exercisers of all fitness levels.

SMART STEP HEIGHT

Tailor step height to accommodate your unique body structure and mobility for optimal biomechanics and safe muscle activation.

TRAINING VERSATILITY

Incline training targets the glutes, hamstrings, and calves, while decline training emphasizes the quadriceps.
